

### Introducing NEW DuraTech Canada Construction Interior Kit

Homes in cold climates require specialized components that work with high insulation values in attic spaces.

This new kit includes some smart solutions and includes:

- Insulated and Adjustable Attic Insulation Shield for insulation depths up to 22".
- Round Ceiling Support with separate Trim Collar that can be installed after energy sealing, sheetrock, or other ceiling finish has been completed.
- Standard Rain Cap

This kit is always the right fit for Northern climates and is available to order NOW!
